

# warehousing solutions

## 1. Trakline™ PLUS

The simple, low maintenance, high speed design for large openings up to 400 sq. ft.

## 2. Steel-Rite™ II Sectional Door

Simple, straightforward, impactable design that helps reduce maintenance costs and downtime from sectional door damage.

## 3. Dock Levelers

Designed for easy servicing and built to handle your most demanding dock operations. All models offer exceptional durability, reliability and the lowest lifetime ownership costs.

## 4. G-Flex™ Universal Door

This modular dock door withstands most inadvertent fork truck impacts. Its flexible design allows for ventilation panels and/or Day-Lite translucent slats for natural light.

## 5. Eliminator-GapMaster™ II Soft-Sided Dock Shelter

The industry's only full access dock shelter that also provides high sealing efficiency and can save hundreds of dollars per year per dock position by preventing energy loss through exposed trailer door hinge gaps.

## 6. STR4000 Dok-Lok® Vehicle Restraint

The industry's only rotating hook restraint that stabilizes the truck trailer, which helps prevent catastrophic and chronic accidents and provides a smooth transition between the loading dock floor and trailer bed.

## 7. PitMaster™

### Under-Leveler Seal

The industry's first and only seal to complete the job of the dock seal or shelter by simply and effectively sealing the 4th side of the dock opening, beneath and around the dock leveler.

## 8. Insulator™ Dock Sealing System with Firefighter™ Head Pad

Provides extended life and highest performance, without the need for wear pleats. Includes the exclusive heat-dissipating Firefighter header seal to protect against burning from the heat of trailer marker lights.

## 9. Dok-Guardian™ Heavy-Duty Safety Barrier

This simple, easy-to-use barrier helps prevent fork trucks, pallet jacks, and pedestrians from falling off the loading dock.

## 10. DokSaver™ Dock Bumper

Backed by a 10 year warranty, its revolutionary design protects your dock equipment and building wall by distributing trailer impacts over its entire back plate.

## 11. Dok-Lok® Vehicle Restraint

Helps prevent all types of trailer separation using a unique rotating hook design, such as aggressive early departure, trailer creep and dock walk, as well as trailer tipover from landing gear collapse or trailer up-ending.

## 12. RainGuard™ Header Seal

Exclusive weighted seal uses gravity to divert rain and melting snow off sides of trailer, keeping water out of the dock area.

## 13. ComboShelter™ II Dock Shelter

Fully impactable dock shelter stands up to the unique challenges of docks that serve a variety of trailer traffic including trailers with liftgates and other rear extensions.

## 14. Global Wheel-Lok™ Vehicle Restraint

Secures trailers without ICC bars by engaging the trailer's rear tire with one 20" barrier to provide safe engagement of virtually all trailer types.

## 15. Survivor™ Impactable Dock Shelter

Affordable alternative to rigid shelters. Durable poly side frames can take a hit from off-center trailers without suffering costly damage.

## 16. BugShield™ Screen Door

Screen mesh design blocks the infiltration of pests into a facility. Available in either a roll-up model, or a convenient sliding model for larger openings.

## 17. Thinman™ Truck Leveler

Eliminates pit wall and bumper obstructions to efficiently access below-dock loads. Global Wheel-Lok Restraint comes standard.

## 18. Shelter Hoods

Available in fabric or metal, hoods are designed to prevent damage to dock seals caused by ice and snow build-up or heavy rain.

## 19. TP II Series Dock Seal

Constructed with durable foam side pads that cushion an incoming truck while providing the tightest seal possible between the truck and the loading dock. Standard Firefighter protection in header prevents burning from trailer marker lights.

## 20. Safe-T-Strut™ Support System

Unique through-the-lip design keeps strut in place to prevent the collapse of dock levelers during maintenance.

## 21. VRS-500 Dok-Lok® Vehicle Restraint

Recessed vertical barrier stores beneath the dock leveler and provides a "clean" dock face and the flexibility to service a wide variety of trailers, including specialty trailers and trailers with liftgates.

## 22. Barrier Systems

Choose from several new heavy-duty or light-duty products to help separate and protect distinct areas of your facility.

## 23. FasTrax™ High Performance Door

Designed around a single operational platform, these doors can match virtually any high cycle interior exterior, high-wind, cooler or freezer application.

## 24. Revolution™ HV/LS Fans

This industrial ceiling fan makes employees more comfortable and productive, while driving down your energy costs.

## 25. Caljan Conveyors

Telescopic belt and roller conveyors can be used to load/unload parcels, packages, boxes or any other form of loose-loaded cargo.

## 26. DuctSox® Fabric Air Dispersion System

Fabric design is used to distribute and disperse air in open ceiling architecture and are a cost effective and aesthetically attractive alternative to metal ductwork.

## 27. Barrier Glider Cold Storage Door

Innovative design combines fast operation and a superior seal with multiple panel choices to fit your specific application requirements.

## 28. Barrier® Infitting Cold Storage Door

Insulated fiberglass personnel door assures environmental separation. Ideal for interior or exterior applications.

## 29. Safe-T-Sprint Power Door

Fast-acting bi-roller door opens horizontally to provide immediate vision and material access.

## 30. FasTrox™ FR Cold Storage Door

Combining the Thermal-Air™ System with the InsulMax R-4 insulated curtain provides an innovative, energy-efficient freezer door.

## 31. Barrier® Vertical Lift Cold Storage Door

Seamless fiberglass panels are 4" or 6" thick for superior insulation and are designed to help maintain temperatures, reduce energy costs and ensure food safety.
